# Who are we?

Condor Flugdienst GmbH has been flying its guests to the most beautiful holiday destinations in the world since 1956.

On an annual basis, about 7 million passengers fly with Condor to about 75 destinations in Europe, Asia, Africa and America.

On average, Condor airplanes use less than three liters (less than 0.8 gallons) per passenger and 100km (62mi), which makes them even more ecofriendly than e.g. cars.

2012 Condor moved to its new headquarters in Frankfurt's new suburb of Gateway Gardens with its close proximity to the airport.

In 2013 and 2014 all Condor long-haul aircraft received a cabin refurbishment with a completely new cabin interior in all three classes.

Condor is the first German airline to introduce *Airshoppen*, which offers the opportunity to go duty-free shopping before they fly, from the comfort of their own homes.
